

2010 Haiti Response Financial Update December 2010

The Canadian Red Cross has received over \$199 million from generous individuals, corporations, provincial and local governments and the Government of Canada to support Red Cross efforts in Haiti.

As of **November 30, 2010** the Canadian Red Cross has committed **\$117 million** to specific projects of which over \$89 million has been spent.

Emergency Response Phase

Contributions to the International Federation of the Red Cross (IFRC)*	32,340,000
Contributions to the International Committee of the Red Cross (ICRC)	304,000
Emergency Relief Items	2,028,000
Emergency Response Unit Hospital	3,046,000
Deployment of relief and recovery staff	1,077,000
Cholera Outbreak Response**	460,000
	\$ 39,255,000

Recovery and Reconstruction Phase

Canadian Red Cross shelter program in Jacmel and Leogane	15,578,000
IFRC shelter program	21,770,000
Hurricane preparation activities	3,030,000
Other recovery programming and support	9,848,000
	\$ 50,226,000

Canadian Red Cross spending

Total spent: \$89,481,000

* Contributions to IFRC emergencies activities are part of the larger Haiti earthquake response (e.g. relief item distribution, emergency shelter items, medical assistance, and water and sanitation activities)

** Contributions for cholera response are as of Nov. 30, 2010 and do not include contributions toward the December deployment of the Canadian Red Cross emergency response unit.

Of the \$117 million in committed funds not yet spent, the Canadian Red Cross will use these funds as follows:

Distribution of relief items:	\$588,000
Cholera response:	\$1 million
Health and Development:	\$2.79 million
Disaster preparedness:	\$685,000
Shelter program:	\$22.4 million

**2010 Haiti Response Financial Update
December 2010**

Based on current assessments, which may change to best meet the needs of affected communities, the Canadian Red Cross anticipates spending in each response phase as follows:

The emergency phase includes activities that meet basic needs, such as the distribution of relief supplies, clean water, medical care (field hospitals) and emergency shelter materials. Recovery work aims to rebuild damaged and destroyed shelter, water and sanitation systems and social/health systems. Long-term development helps communities become stronger, healthier and more resilient, based on the needs within communities. Phases overlap, particularly in Haiti where emergency activities are ongoing as new crises develop.

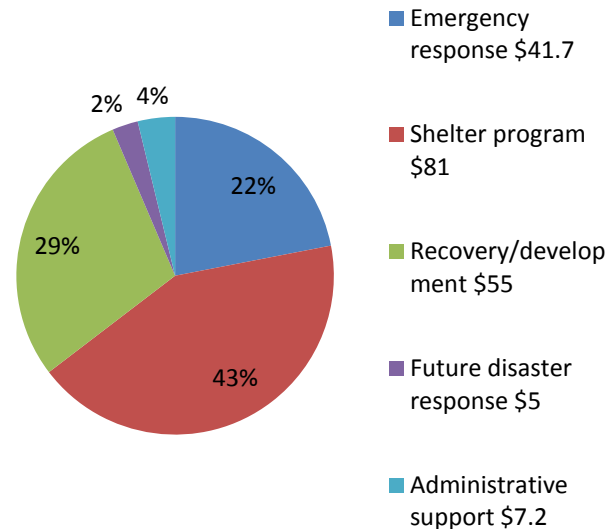

Planned spending:

The Canadian Red Cross is committed to supporting communities in the months and years ahead as Haiti recovers and rebuilds. This process is expected to take 10 years.

In addition to spending to date, the funds received will be used to implement programming in community-based health, violence prevention, and disaster preparedness. It will also be used to rebuild health infrastructure and strengthen the disaster response capacity of the Haitian Red Cross.

The bulk of donations will be spent during the recovery phase, where careful planning and community engagement is vital to ensuring a sustainable result.

**Actual and projected spending
\$199 million**

**Spending projections are based on current assessments and may change based on needs.*
